Comments

(Set forth by above question #, if applicable.
Use "Additional Comments" Sheet, if needed)

File #: 95-259130

#1: With microscopic hair comparison, even with the best notes, there is no way to determine the comparison was performed correctly. The cotton fibers were examined appropriately.

#2: The examination results set forth in the laboratory report are supported by the bench notes, but the documentation is marginally adequate. The notes are not dated or initialed and are in pencil. RQ uses the abbreviation "fifvte" to apparently indicate there are no fibers of evidential value on certain item, but it is not known what this abbreviation represents.
